

## **“Mine Water and the Environment” Volume 17, Number 1–4, August 1998**

---

**Diz, H. R.** (1998): The Selective Oxide System: Acid Drainage Treatment that avoids the Formation of Sludge. - Mine Water and the Environment, **17: 1-7, 3 fig.;** Colorado.

**Hammack, R. W., de Vegt, A. L. & Schoeneman, A. L.** (1998): The Removal of Sulfate and Metals from Mine Waters using Bacterial Sulfate Reduction: Pilot Plant Results. - Mine Water and the Environment, **17: 8-27, 7 fig., 5 tab.;** Colorado.

**Hellier, W. W.** (1998): Abatement of Acid Mine Drainage by capping a reclaimed Surface Mine with fluidized Combustion Ash. - Mine Water and the Environment, **17: 28-40, 13 fig., 3 tab.;** Colorado.

**Helling, C., Nietzsche, O., Ullrich, B. & Merkel, B.** (1998): The Influence of municipal Waste on Uranium Mill Tailings: A hydrogeochemical Study on a mixed Tailings Site. - Mine Water and the Environment, **17: 41-51, 3 fig.;** 7 tab.;; Colorado.

**Iwanoff, A.** (1998): Environmental Impacts of deep opencast Limestone Mines in Laegerdorf, Northern Germany. - Mine Water and the Environment, **17: 52-61, 2 fig.;** 2 tab.;; Colorado.

**Osiensky, J. L., Williams, R. E., Ralston, D. R., Johnson, G. S. & Mink, L. L.** (1998): Simulation of electrical Potential Differences near a contaminant Plume excited by a Point Source of Current. - Mine Water and the Environment, **17 : 62-71;** Colorado.
